Articles of Interest: Pelvic Health and Transmasculine Patients

Provided by the University of Missouri-Kansas City School of Nursing and Health Studies
Jointly-Provided by the Clinical Training Center for Family Planning

Overview

The NCTCFP presents a new Continuing Education modality, “**Articles of Interest**,” featuring journal articles to keep you informed of family planning and reproductive health topics. This new on-line resource provides an easy way to obtain CE credit at your convenience! Just read the articles and complete a quiz about the content.

This 1.25 hours Articles of Interest activity is part of the June 2023 Clinician Cafe and discusses issues around pelvic pain, menstruation, and Pap tests in transmasculine patients.

Successful Completion

This course offers 1.25 contact hours. To receive contact hours, participants must complete the course with a satisfactory grade of 80% or higher on the quiz and complete the Evaluation/Request for Credit form. CNE and CPH Certificates as well as Certificates of Completion will be available immediately upon passing the course and submitting the evaluation.

Objectives

- Identify three factors associated with pelvic pain while taking testosterone for gender-affirming purposes.
- Describe the effects of serum testosterone levels on vaginal bleeding and spotting.
- Discuss multiple special considerations around cervical cancer screening and Pap tests for transmasculine patients.

Conflict of Interest

In accordance with continuing education guidelines, speakers and planning committee members have disclosed financial relationships with commercial interests that may create a potential conflict of interest.
